

The background of the entire page is a high-angle, wide-area photograph. In the foreground, a lush green hillside slopes down from the bottom left towards the center. A large, dark metal electricity pylon stands prominently on the left side of the hill. Beyond the hill, a vast, densely packed urban landscape stretches out to the horizon. The city is filled with numerous high-rise buildings of varying heights and colors, mostly in shades of grey, white, and blue. In the distance, a body of water is visible, with a few small islands and more distant landmasses on the horizon. The sky is a mix of light blue and soft orange/pink hues, indicating either sunrise or sunset. The overall atmosphere is one of a modern, sprawling metropolis integrated with natural elements.

Green Finance, Sustainability Strategies and ESG Consultancy Services

About Allied Environmental Consultants Limited

Founded in 1994, Allied Environmental Consultants Limited ("AEC") is a Hong Kong based pioneering sustainability and environmental consulting firm with 25 years' experience. Our holding company, Allied Sustainability and Environmental Consultants Group Limited (stock code: 8320), is the first listed sustainability and environmental consultancy service provider in Hong Kong.

Today, AEC is an award winning consultancy with an extensive portfolio spanning Hong Kong, mainland China and the Asia Pacific region. We strive to offer independent and professional advice to our clients, positively transform the environment and communities, and shape a sustainable future for the world.

As a trusted partner of leading property developers, architectural firms, financial institutions, universities and government authorities, AEC provides professional consultancy services on:

- **Green Building Certification Consultancy;**
- **Sustainability and Environmental Consultancy;**
- **Acoustics, Audio-Visual and Lighting Design Consultancy; and**
- **Environmental, Social and Governance ("ESG") Reporting and Consultancy.**

AEC is a corporate member of:

Our Sustainability Culture

At AEC, we see our projects as part of the solution that steers businesses towards sustainable development. Through our innovative solutions we are pushing the frontiers of sustainability and setting the standard for best practices for others to follow. Likewise, the continuity of our business is highly dependent on the sustainability framework, as well as our ability to influence the corporate sustainability agenda. From inspiring sustainable corporate practices to designing sustainable building features, down to our involvement in community projects, sustainability underpins our core business functions and serves as a measurable standard to which we align key decisions and practices.

AEC ESG Team

ESG aspects of one business have become inevitably important for investors to consider. With our accomplishment in our environmental related projects, our ESG team put strong emphasis on the environmental issues of our clients' businesses. Leveraging on AEC's collective expertise, our ESG consultancy services provide businesses with an in-depth understanding of the social and environmental impacts of their operations while guiding them in their journey to become sustainably operated and resilient businesses.

Our Values

Leading our clients to the path of sustainable future, our mission is to create true value through offering solutions that would achieve beyond compliance. We adopt a holistic approach to understand our respective client's business, advise the latest updates on industry trends, raise awareness on ESG matters, build capacity, assist in policy enhancements, and review sustainable operations. AEC offers innovative and engaging solutions for our clients to enhance the sustainability performance of their business operations.

Our Approach

Our Portfolio

We are currently assisting over 40 companies of various industries onto the path of sustainable development:

Our Services

We provide one-stop ESG services to not only help our clients comply with the reporting requirements, but also formulate tailor-made sustainability strategies and drive long-term improvement in sustainability performance through innovative solutions.

Fact

Many companies have their defined sustainability visions, missions and commitments but not everyone has a strategic plan that puts words into actions. By developing roadmaps and action plans, it helps to cement the companies' positions in their industries and to integrate sustainability factors into their financial policy framework.

From investors and customers to employees and suppliers, stakeholders are key factors in sustainable business. Accessible engagement channels assist in mapping their concerns and enhancing overall competitiveness of a company.

It is always wise for corporates to prioritize significant and relevant issues, and allocate resources accordingly. Meanwhile, investors are increasingly aware of ESG-related risks beyond traditional financial data and favour corporates with better ESG performance.

Data not only reflect progress that corporates have made on ESG aspects, but they are also factored in ESG credit rating decisions. Widely recognized by investors, ESG indices and ratings rank listed companies on sustainability performance.

Since 2016, all companies listed on HKEx are required to comply with the ESG Reporting Guide. In response to the rising demand on more comprehensive ESG reporting, tightened reporting requirements are expected to be effective on 1 January 2020.

In an effort to build trust and recognition, more and more corporates go beyond the minimum ESG reporting compliance and pursue continuous improvement of their ESG measures.

Services

Sustainability strategy

- Benchmark & gap analysis
- Sustainable development roadmap
- Green finance advisory

Stakeholder engagement

- E-survey
- Interview & workshop
- e-Learning platform
